Ocean Navigator *master* Changelog

2020

March

- Resolved a front-end security vulnerability.
- Significantly increased timeout threshold of Nginx web server as a temporary workaround for some slowly-generating plots failing to appear on the website. We are looking to investigate the underlying issues as soon as possible.

February

- Updated Marine Protected Areas KML to reflect Policy updates made in 2019. Available under Area->DFO Marine Protected Areas.
- Added Vancouver ferry routes KML. Available under Line->Vancouver Ferry Routes. Here are the routes displayed:
    - Victoria-Port Angeles
    - Crofton-Vesuvius
    - Sidney-Tsawwassen
    - Duke Point-Tsawwassen
    - Departure Bay-Horseshoe Bay
    - Saltery Bay-Earls Cove
- Historical GIOPS Daily & Monthly averages made available again.
- Sonic Layer Depth derived variable available on all GIOPS/RIOPS 3D datasets.
- All time-stamps are displayed in UTC in the front-end time-picker (as originally intended).
- Resolved some server-side security vulnerabilities.
